I am working in the banking sector.We have recently processed millions of PPP loans during the Pandamic

We have used the clustering model with the following predictors

1. Revenue – Ex..clustered with monthly revenue - 100k,100-500k,500k-1m
2. Region – Ex..clustered with East, west,south , North
3. Number of employees – Ex,, clustered with small, medium, large
4. Credit score – Ex clustered with poor, avg, good, outstanding
5. Ethnicity - Ex .. Citizen vs non-citizens
